FASTER TOOL DELIVERY WITH AI

PROFILE

I design systems that make games feel great — and I build the tools that help teams make them faster. Over 10+ years across mobile, PC, and multiplayer titles, I've gone from QA to Lead Designer, shipping titles ranging from turn-based tycoons to competitive shooters. Recently I've added AI-assisted tool development to my practice: I design the system architecture, AI handles the heavy lifting, and what used to take a month now ships in a week. I care deeply about the player experience, but I care just as much about the team experience — good documentation, smart tooling, and zero burnout.

CORE SKILLS

Game Design

Systems Design · Mechanic Design · Level Design · UX Design · Balancing · Prototyping · FTUE · Documentation

Technical

Unreal Engine 5 · Blueprint Scripting · AI-Assisted Tooling · Data-Driven Design · Unity (basic)

Tools

Miro · Figma · Confluence · Notion · Jira · Excel · Claude · Cursor

Leadership

Cross-discipline Collab · Mentoring · Team Leadership · Agile / Scrum

PROFESSIONAL EXPERIENCE

Level Designer

Oct 2025 – Present

Tripledote Studios · Jakarta, Indonesia

Puzzle Solitaire — Mobile

- ★ Built level editor tooling with AI-assisted development — cut delivery time from 3–4 weeks to under one week.
- Designed the full content generation pipeline, enabling scalable, high-volume level production.
- Fluent in AI as a daily workflow tool — I own the system design, AI accelerates execution.

Game Designer

Mar 2025 – Mar 2026

Worlds — Team Waifu · Freelance / Contract

WTF: Waifu Tactical Force — PC · Steam

- Contributed to game design and weapon balancing using data-driven analysis.
- Helped shape and establish the team's design workflow and documentation practices.

Level Designer

Nov 2022 – Aug 2024

Gamecan · Pärnu, Estonia · On-site

Contenders: Arena — Multiplayer Shooter · Unannounced Horror Game · Unannounced Survival · Unannounced Adventure

- Designed 5+ multiplayer levels (TDM, Tutorial, Racing) in Unreal Engine 5.
- Reworked weapon balance and camera/3C systems across all character classes.
- Contributed to a multi-phase boss fight design alongside the team.

★ Created the team's design documentation template and enforced its adoption — reduced miscommunication by 60% across disciplines.

Lead Game Designer / prev. Senior Game Designer Jun 2019 – Nov 2022
Agate International · Bandung, Indonesia

Valthirian Arc: Hero School Story 2 **Tirta**

- Directed system & UX design from concept to release; led onboarding (FTUE) improvements that raised retention.
- ★ **Balanced in-game economy through data-driven iteration using self-built Excel simulation tools.**
- Built a monster placement tool that cut designer workload by 60%.
- Managed team priorities with zero burnout incidents across the project.

Senior Game Designer / prev. Junior Game Designer Mar 2016 – Jun 2019
Gameloft · Yogyakarta, Indonesia

- Delivered a new hyper-casual prototype every 1–2 weeks on the Prototyping Team.
- Designed and implemented 5+ levels for a side-scrolling shooter; optimised mobile assets by up to 90%.

QA Senior Tester / prev. QA Tester Jul 2011 – Sep 2013
Gameloft · Yogyakarta, Indonesia

- Built foundational knowledge of game dev pipelines and quality standards across multiple mobile titles.

KEY PROJECTS

Puzzle Solitaire Triplicated Studios · Mobile

- Built level editor tooling from scratch using AI-assisted development — compressed a 3–4 week build to under a week.
- Designed the content generation workflow for scalable level production.

WTF: Waifu Tactical Force Worlds · PC · Steam

- Data-driven weapon balancing and design workflow setup for an anime tactical FPS.

Valthirian Arc: Hero School Story 2 Agate · UE4 · PC / Console

- Designed economic progression systems, led UI/UX from concept to release, and developed 3C across all game modes.

Contenders: Arena Gamecan · UE5 · PC / Console

- Designed 5+ multiplayer levels; balanced weapons and reworked camera systems for competitive fairness.

Tirta Agate · UE4 · PC

- Designed tutorial through first boss; prototyped puzzle mechanics, implemented UI/UX and in-game cinematics.

PERSONAL PROJECTS

Solo Developer Jul 2020
Seenchan Game · Personal Project

BAL Solid — PC · Steam

- ★ **Designed, built, and shipped a casual physics puzzle game entirely solo — 70 levels, 72 achievements, 100% positive reviews on Steam.**
- Handled the full development pipeline independently: game design, level design, implementation, and Steam platform publishing.
