

Chandra Sunarseto

Game Designer | Technical Designer | Level Designer

Jakarta, Indonesia · chandra.sunarseto@live.com · [linkedin.com/in/chandrasunarseto](https://www.linkedin.com/in/chandrasunarseto) · [Portfolio](#)

PROFILE

Game designer with 10+ years across mobile, PC, and multiplayer titles, progressing from QA to Lead Designer and shipping 15+ titles and projects ranging from turn-based tycoons to competitive shooters. I design systems that make games feel great and build the internal tools that help teams make them faster. Recently I have added AI-assisted tool development to my practice: I design the system architecture, AI handles the heavy lifting, and work that used to take a month now ships in a week. I care deeply about the player experience and just as much about the team experience: good documentation, smart tooling, and zero burnout.

CORE SKILLS

Game Design: Systems Design, Mechanic Design, Level Design, UX Design, Balancing, Prototyping, FTUE, Documentation

Technical: Unreal Engine 4 & 5, Blueprint Scripting, AI-Assisted Tooling, Data-Driven Design, Unity (basic)

Tools: Figma, Miro, Confluence, Notion, Jira, Excel, Claude, Cursor

Leadership: Team Leadership, Mentoring, Cross-Discipline Collaboration, Agile / Scrum

PROFESSIONAL EXPERIENCE

Level Designer Oct 2025 – Present

Tripledote Studios · Jakarta, Indonesia

Puzzle Solitaire — Mobile

- **Built level editor tooling with AI-assisted development, cutting level delivery time from 3–4 weeks to under one week.**
- Designed the full content generation pipeline, enabling scalable, high-volume level production.
- Use AI as a daily workflow tool, owning the system design while AI accelerates execution.

Game Designer Mar 2025 – Mar 2026

Worlds (Team Waifu) · Freelance / Contract

WTF: Waifu Tactical Force — PC, Steam

- Contributed to game design and weapon balancing using data-driven analysis.
- Helped shape and establish the team's design workflow and documentation practices.

Level Designer Nov 2022 – Aug 2024

Gamecan · Pärnu, Estonia (On-site)

Contenders: Arena (Multiplayer Shooter) and unannounced horror, survival, and adventure titles

- Designed 5+ multiplayer levels (TDM, Tutorial, Racing) in Unreal Engine 5.
- Reworked weapon balance and camera/3C systems across all character classes.
- Contributed to a multi-phase boss fight design alongside the team.
- **Created the team's design documentation template and drove its adoption, reducing cross-discipline miscommunication by 60%.**

Lead Game Designer (prev. Senior Game Designer) Jun 2019 – Nov 2022

Agate International · Bandung, Indonesia

Valthirian Arc: Hero School Story 2; Tirta

- Directed system and UX design from concept to release; led onboarding (FTUE) improvements that raised retention.

- **Balanced the in-game economy through data-driven iteration using self-built Excel simulation tools.**
- Built a monster placement tool that cut designer workload by 60%.
- Managed team priorities with zero burnout incidents across the project.

Senior Game Designer (prev. Junior Game Designer) Mar 2016 – Jun 2019

Gameloft · Yogyakarta, Indonesia

Prototyping Team

- Delivered a new hyper-casual prototype every 1–2 weeks on the Prototyping Team.
- Designed and implemented 5+ levels for a side-scrolling shooter and optimized mobile assets by up to 90%.

QA Senior Tester (prev. QA Tester) Jul 2011 – Sep 2013

Gameloft · Yogyakarta, Indonesia

- Built foundational knowledge of game development pipelines and quality standards across multiple mobile titles.

KEY PROJECTS

Puzzle Solitaire Tripledot Studios · Mobile

- Built level editor tooling from scratch using AI-assisted development, compressing a 3–4 week build to under a week.
- Designed the content generation workflow for scalable level production.

BAL Solid Solo · PC, Steam

- **Designed, built, and shipped a casual physics puzzle game entirely solo: 70 levels, 72 achievements, and 100% positive reviews on Steam.**
- Handled the full development pipeline independently: game design, level design, implementation, and Steam platform publishing.

Valthirian Arc: Hero School Story 2 Agate · UE4 · PC / Console

- Designed economic progression systems, led UI/UX from concept to release, and developed 3C across all game modes.

Contenders: Arena Gamecan · UE5 · PC / Console

- Designed 5+ multiplayer levels and reworked weapon balance and camera systems for competitive fairness.

Tirta Agate · UE4 · PC

- Designed tutorial through first boss, prototyped puzzle mechanics, and implemented UI/UX and in-game cinematics.

EDUCATION & LANGUAGES

Diploma, Computer Information Management 2009 – 2011

University Amikom · Yogyakarta, Indonesia

Languages: English (Proficient), Indonesian (Native)
